TutorTech AP Physics 1 Formula Sheet

TutorTech Online Tutoring Learning Management System

Date: October 2026 | tutortech.com

Kinematics: v = v0 + at | x = x0 + v0*t + 0.5*a*t^2 | v^2 = v0^2 + 2a(x - x0)

Dynamics: F_net = ma | F_friction <= mu * F_normal

Work & Energy: W = F * d * cos(theta) | KE = 0.5 * m * v^2 | PE = mgh

Rotational: omega = omega0 + alpha*t | torque = r * F * sin(theta)
