Unit 1: Kinematics & Projectile Motion

TutorTech Online Tutoring Learning Management System

Date: October 2026 | tutortech.com

Q1. A projectile is launched at 35 degrees with initial speed 24 m/s.

Calculate the total time of flight and maximum horizontal range.

Q2. Draw the vector breakdown for velocity components Vx and Vy.

Q3. Explain why the horizontal acceleration is zero when neglecting air resistance.

Due Date: Friday midnight. Submit through TutorTech Classwork tab.
